

Brow Lamination/Brow Tint Aftercare

*****FAILURE TO FOLLOW AFTER-CARE INSTRUCTIONS MAY RESULT IN DISAPPOINTING RESULTS THAT WILL NOT LAST AS LONG AS EXPECTED*****

PRIOR TO RECEIVING YOUR TREATMENT

- Stop exfoliating and don't use Retin-A or AHA, or any anti-aging skincare around the brow area for 3 days prior to your Brow Lamination treatment.
- Avoid fake tanning products (including gradual tan) on the face for 3 days prior to your Brow Lamination treatment, as it can discolor the eyebrow tint (unless you're after khaki-colored brows)

THE FIRST 24 HOURS AFTER RECEIVING YOUR BROW LAMINATION/BROW TINT

- You should avoid getting your brows wet for the first 24 hours after your treatment. Water could interfere with the lamination/tint process and impact the longevity of your treatment.
- Avoid swimming pools and baths for the first 24 hours and be extra careful in the shower and when washing your face (avoiding if possible). If you must take a shower, please use the provided shower shield.

FIRST WEEK AFTER RECEIVING YOUR BROW LAMINATION/BROW TINT

- Cleanse your face with the water free cleanser provided (Elemis Micellar Water) and remove cleanser with a moistened cotton pad.
- Be careful not to touch, rub, or otherwise contact your treated brows for 24 hours.
- Use the provided spoolie to gently comb any tangled brow hairs back into place.
- Avoid applying heavy makeup (eg foundations) on the area around the brow for 24 hours. The hair follicles can remain open for a while after hair removal, so if you are prone to sensitivity or breakouts, you may find that heavy makeup could clog the pores.
- Avoid contact with direct sunlight, sunbeds, saunas, steam rooms and swimming pools for the first 48 hours as the skin can be left sensitive and prone to irritation from heat.
- Avoid exfoliating and don't use Retin-A or AHA, or any anti-aging skincare around the brow area for 3 days after your Brow Lamination/Brow Tint treatment.
- Avoid fake tanning products (including gradual tan) on the face for 3 days after to your Brow Lamination treatment, as it can discolor the eyebrow tint (unless you're after khaki-colored brows)

KEEPING YOUR BROWS IN SHAPE AFTER BROW LAMINATION/BROW TINT

- Brow lamination does not permanently set your hairs in your desired, brushed up position. It breaks down the bonds in your hair so that you can easily manipulate them into the look you want. Just brush them back into place with a spoolie brush in the morning to get them back to that fluffy finish – no product required. These results will last for 6-8 weeks.
- To really enhance laminated brows and maintain that freshly laminated look right up to your next appointment, a sample of Anastasia Brow Gel (an ultra-strong eyebrow gel) is provided. This product is available for purchase in our salon in clear or 7 shades. It can be used alone or as a topcoat to your eyebrow makeup as the gel dries without leaving residue behind, giving brows a fuller appearance and a polished finish.
- Avoid strong UV lights as this can cause the tint to fade quicker.
- Tints will last up to 3-4 weeks and will gradually fade after 2 weeks as brow hairs grow.
