

# Brow & Lash Tint Aftercare

**\*\*\*FAILURE TO FOLLOW AFTER-CARE INSTRUCTIONS MAY RESULT IN DISAPPOINTING RESULTS THAT WILL NOT LAST AS LONG AS EXPECTED\*\*\***

## **PRIOR TO RECEIVING YOUR TREATMENT**

- Stop exfoliating and don't use Retin-A or AHA, or any anti-aging skincare around the brow or lash area for 3 days prior to your Brow or Lash Tint treatment.
- Avoid fake tanning products (including gradual tan) on the face for 3 days prior to your Brow or Lash Tint treatment, as it can discolor the eyebrow tint (unless you're after khaki-colored brows or lashes)

## **THE FIRST 24 HOURS AFTER RECEIVING YOUR BROW OR LASH TINT**

- You should avoid getting your brows or lashes wet for the first 24 hours after your treatment. Water could interfere with the tint process and impact the longevity of your treatment.
- Avoid swimming pools and baths for the first 24 hours and be extra careful in the shower and when washing your face (avoiding it if possible). If you must take a shower, please use the provided shower shield.

## **FIRST WEEK AFTER RECEIVING YOUR BROW OR LASH TINT**

- Be careful not to touch, rub, or otherwise contact your treated brows or lashes for 24 hours.
- Use the provided spoolie to gently comb any tangled brow hairs back into place.
- Avoid applying heavy makeup (e.g., foundations) on the area around the brows or lashes for 24 hours. The hair follicles can remain open for a while after hair removal, so if you are prone to sensitivity or breakouts, you may find that heavy makeup could clog the pores.
- Avoid contact with direct sunlight, sunbeds, saunas, steam rooms and swimming pools for the first 48 hours as the skin can be left sensitive and prone to irritation from heat.
- Avoid exfoliating and don't use Retin-A or AHA, or any anti-aging skincare around the brow or lash area for 3 days after your Brow or Lash Tint treatment.
- Avoid fake tanning products (including gradual tan) on the face for 3 days after your Brow or Lash Tint treatment, as it can discolor the eyebrow or eyelash tint (unless you're after khaki-colored brows or lashes)

## **KEEPING YOUR BROWS OR LASHES IN SHAPE AFTER BROW OR LASH TINT**

- To really enhance and maintain that freshly bold look right up to your next appointment, use Anastasia Brow Gel (an ultra-strong eyebrow gel) for your brows, and Elleebana Clear Aftercare Mascara for your lashes. Both products are available for purchase in our salon.
  - **Anastasia Brow Gel** is available in clear or 7 shades. It can be used alone or as a topcoat to your eyebrow makeup as the gel dries without leaving residue behind, giving brows a fuller appearance and a polished finish.
  - **Elleebana Clear Aftercare Mascara** is specifically designed for lash lifts and tints and is great before regular mascara and during your nightly routine.
- Avoid strong UV lights as this can cause the tint to fade quicker.
- Tints will last up to 3-4 weeks and will gradually fade after 2 weeks as brow hairs grow.
