

# Lash Lift/Lash Tint Aftercare

**\*\*\*FAILURE TO FOLLOW AFTER-CARE INSTRUCTIONS MAY RESULT IN DISAPPOINTING RESULTS THAT WILL NOT LAST AS LONG AS EXPECTED.\*\*\***

## **FIRST 24 HOURS AFTER RECEIVING YOUR LASH LIFT/LASH TINT**

- Do not get lashes wet. If you must take a shower, please use the provided shower shield.
- No other facial treatments or eye makeup.
- Avoid using oil-based products on your lashes.

## **WITH LASH LIFTS OR LASH TINTS YOU NEED TO AVOID OIL-BASED PRODUCTS**

- Avoid using waterproof mascara because it often needs to be removed with an oil-based makeup remover.
- Do not use oil-based eye products including skincare and/or makeup remover.

## **OTHER CAUTIONS**

- Use of sauna or swimming is possible after 24 hours but may weaken the effect of the lift or tint.
- Be gentle with your lashes – no rubbing.
- Avoid strong UV lights as this can cause the tint to fade quicker.

## **HOW TO CARE FOR LASH LIFTS AND LASH TINTS**

- Lifts will last up to 6-8 weeks. Please do not re-lift any sooner than 4 weeks.
- Tints will last up to 3-4 weeks and will gradually fade after 2 weeks as lashes grow.
- Cleanse your face with the water free cleanser provided (Elemis Micellar Water) and remove cleanser with a moistened cotton pad.
- Use Elleebana Advanced After Care Mascara for your lashes in-between treatments. It helps to maintain optimum lash lift results and promotes lash health.
- Use the spoolie provided when not using Mascara.
- Having your lashes lifted on a regular basis is highly recommended. Our products contain Keratin to pamper. Keratin strengthens your lashes and helps to promote overall lash health. Your lashes will thank you for it!
- Minimize transportation in open-air-vehicles where strong wind is likely, for example, driving in cars with windows down, convertibles, motorcycles, bicycles, and boats.
